# UVOD

## 1.1 Korisceni programski jezici

Za izradu sajta, korisceni su sledeci jezici:

- Html
- CSS
- Javascript
- jQuery
- XML
- JSON
- Regex

Svi navedeni jezici, biblioteke I framework-ovi su pisani unutar Visual Studio Code okruzenja.

## 1.2 Opis funkcionalnosti

Sadržaj svih stranica je mesovito ispisan. Svaka stranica sadrzi staticke i dinamicke elemente.

➤ **Dinamicki ispisani** elementi su:

1. Linkovi navigacionog menija,
2. Footer linkovi,
3. Slajder,
4. Proizvodi,
5. DropDown liste (kategorija proizvoda, brendovi, popusti, oprativni sistemi sortiranje - ucitani iz eksternih JSON datoteka i LOCAL STORAGE),

➤ **Staticki ispisani** elementi su svi tekstovi informativnog karaktera koji se ne menjaju, kao I elementi forme.

**Ostale funkcionalnosti:**

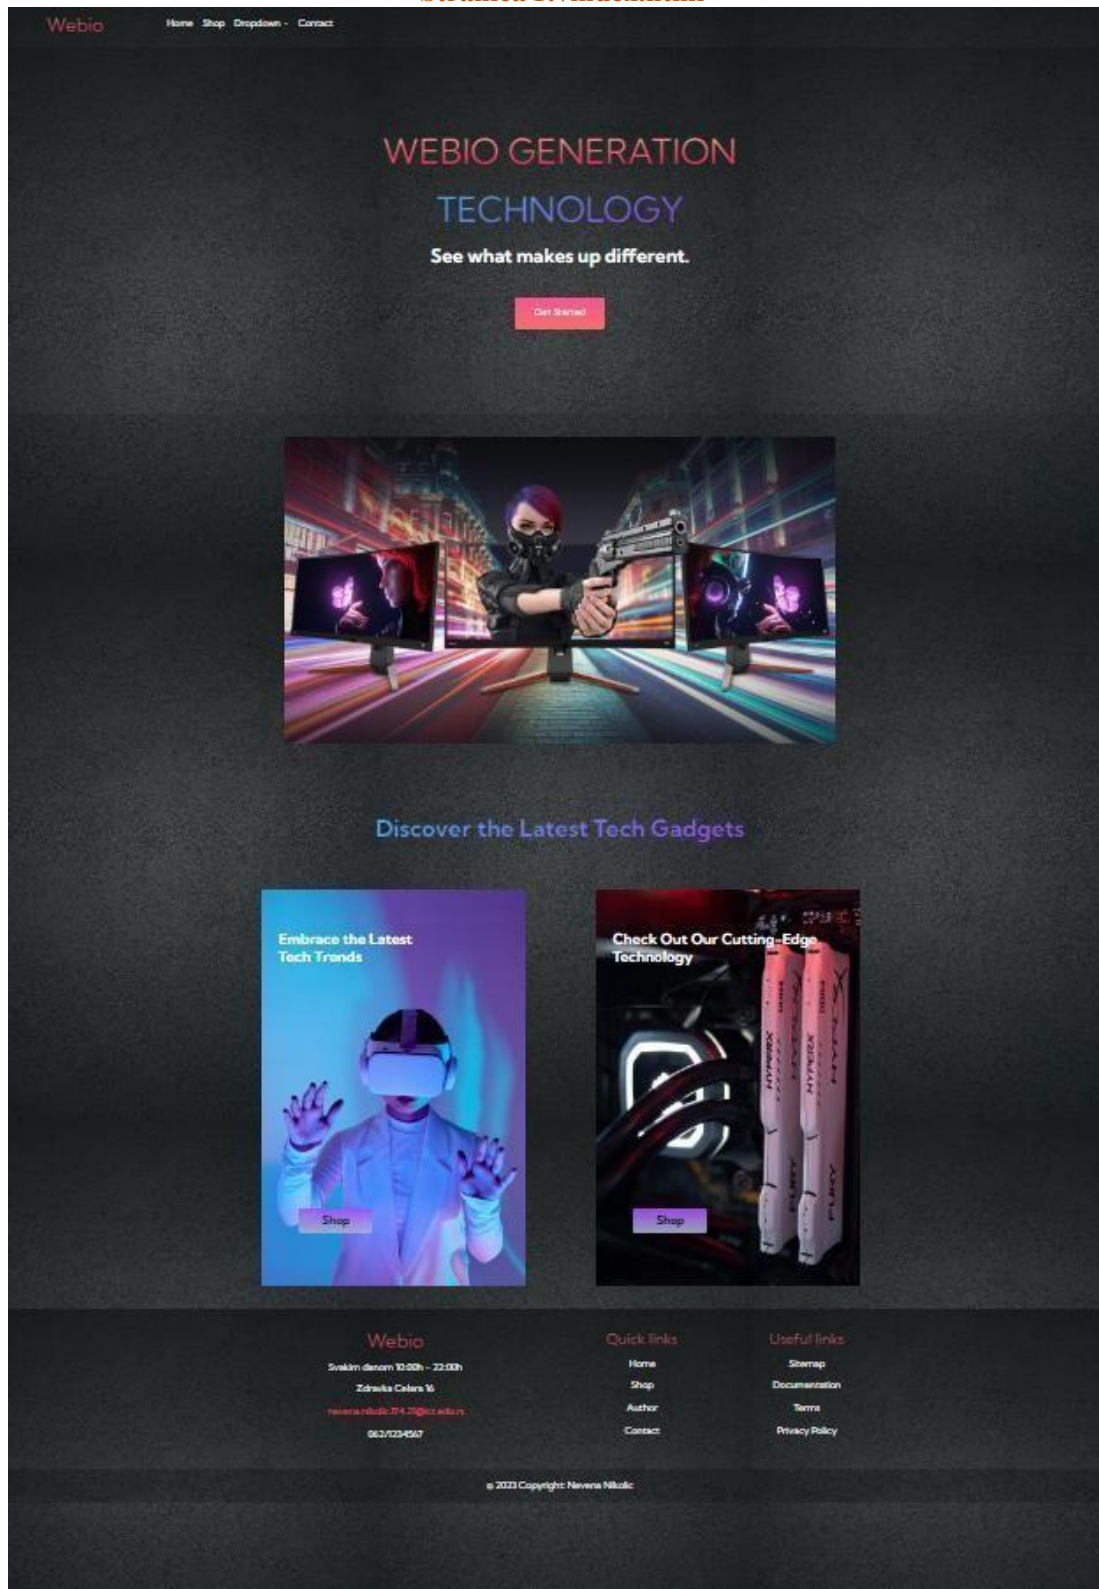

- a. Dinamicko generisanje modala za specifikacije proizvoda, koji sadrzi sve o proizvodu, kao I njegov naziv, sliku, cenu, a takodje I popust I staru cenu ukoliko ih ima.
- b. Filtriranje proizvoda po kategoriji: Monitori, Kucista, Maticne ploce, Graficke
- c. Filtriranje proizvoda po brendu: Samsung, LG, Apple, Asus
- d. Filtriranje proizvoda prema popustu: Svi proizvodi sa popustom ili bez popusta
- e. Filtriranje proizvoda prema operativnom sistemu: Windows, Linux, MacOS - jedan proizvod moze da podrzi vise operativnih sistema (ali i ne mora)
- f. Filtriranje proizvoda prema pretrazi po njihovom nazivu,
- g. Sortiranje proizvoda po: ceni (rastuce, opadajuce), nazivu (rastuce, opadajuce), datumu objavljivanja(po godini).
- h. Validacija kontakt forme - obrada gresaka,

- i. Svrstavanje proizvoda u korpu za porudzbenu, koja se cuva u Local Storage (dostupni na svakoj stranici).
- j. Generisanje ukupne cene proizvoda po njihovim kolicinama i cenama.

## 1.3 Dizajn sajta

Za izradu sajta nije koriscen Template, vec samo Bootstrap za kreiranje gotovih, responsive elemenata.

<hello>

I am Nevena Nikolic, a 22-year-old student that is currently studying Web programming module on the Internet technologies, a part of the ICT College in Serbia. I come from Pancovo, a city near the capital city of Serbia Belgrade, where I finished elementary and high school. By enrolling in ICT my decision to tinker with computers was my way to set a stable future for me, right now in the specter of Web, and who knows what tomorrow. By now I have 3 projects that helped me learn the knowledge that I currently hold, and use on my website.

## 2.3 Slike stranica i opis funkcionalnosti

### Korpa

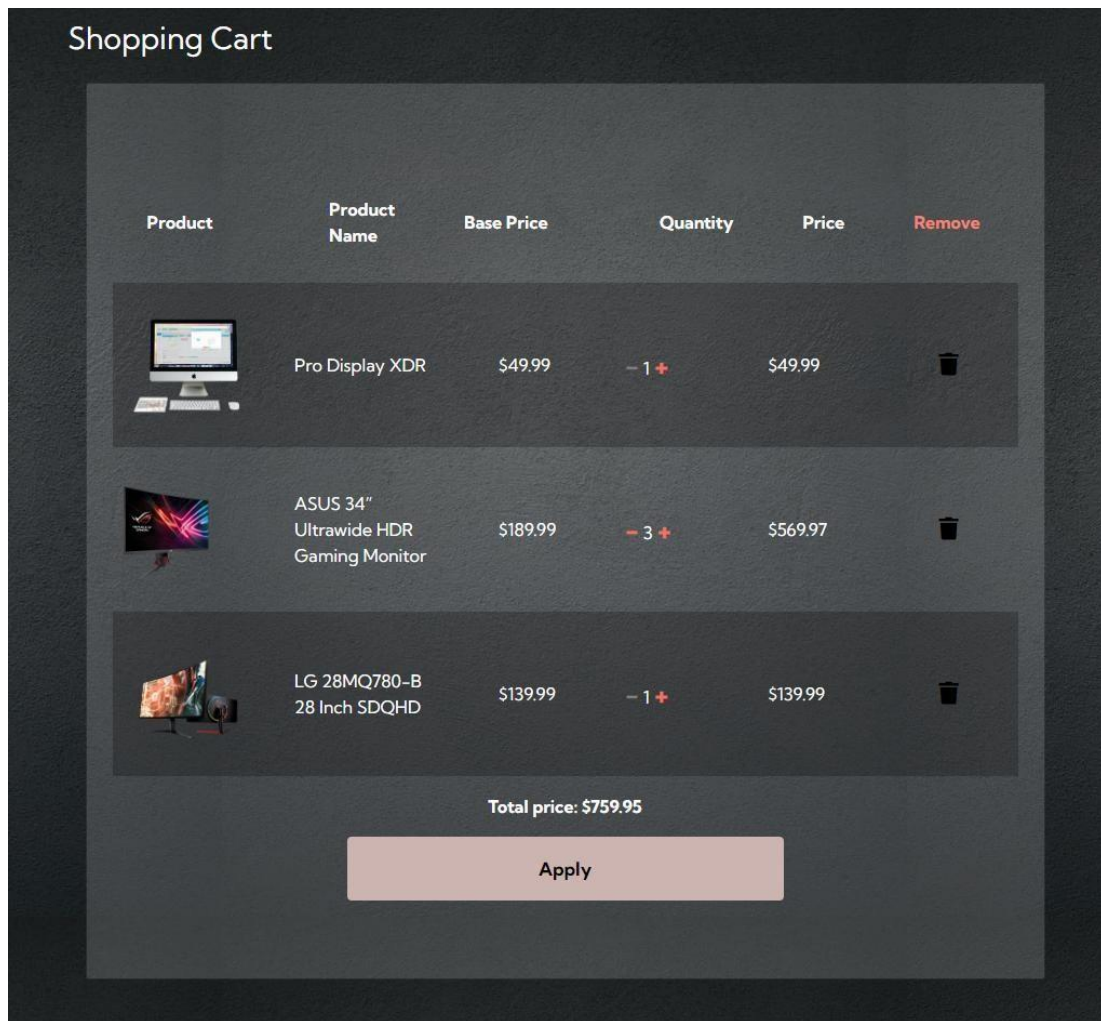

Korpa predstavlja funkcionalnost koja omogućava korisnicima da dodaju proizvode u korpu tokom procesa kupovine. Korpa je uvek vidljiva korisniku na /shop.html stranici, omogućavajući im da lako prate i uredjuju svoju korpu.

#### Funkcionalnost:

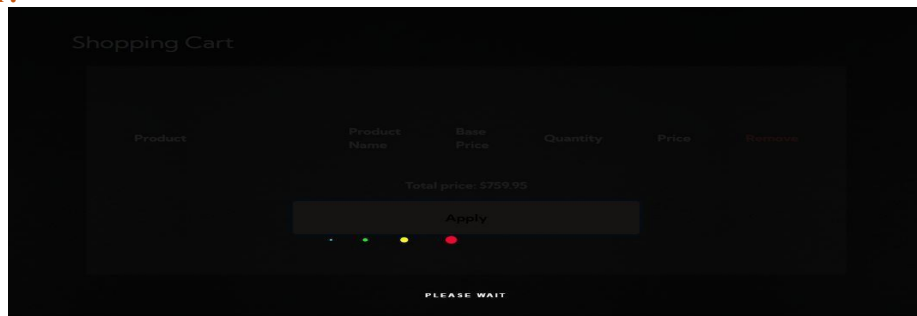

1. Dodavanje proizvoda u korpu: korisnici mogu da dodaju proizvode u korpu sa shop.html stranice klikom na dugme "Add to cart". Kada korisnik dodaje proizvod u korpu, broj proizvoda u korpi se automatski azurira i pojavljuje mu se iznad korpe tekst da su uspesno dodali proizvod u korpu koji traje tri sekunde sa metodom `fadeOut()`;
2. Uredjivanje korpe: korisnici mogu da uredjuju svoju korpu uklanjajući proizvode koji im više nisu potrebni ili promenom kolicine proizvoda na ikonicu - i +. Ikonica za smanjenje kolicine ce se automatski disabled-ovati, ako je kolicina proizvoda u korpi 1.
3. Detaljan pregled korpe: korisnici mogu da pregledaju detalje svoje korpe, uključujući cenu proizvoda i ukupnu cenu, kolicinu kao i opcije za promenu ili brisanje.
4. Proces kupovine: korisnici mogu da nastave proces kupovine klikom na "Apply" taster nakon cega ce im se prikazati Preloader sa tekстом "Please wait" i nakon njega prikazati poruka o uspesnoj potvrdi kupovine, kao i link ka stranici shop.html.
5. Brisanje proizvoda iz korpe: korisnici mogu da uklone proizvode iz svoje korpe ako više nisu zainteresovani za njih ili su napravili gresku prilikom odabira proizvoda, tako sto ce obrisati sve proizvode klikom na "Remove" ili pojedinačan proizvod klikom na ikonicu kante.

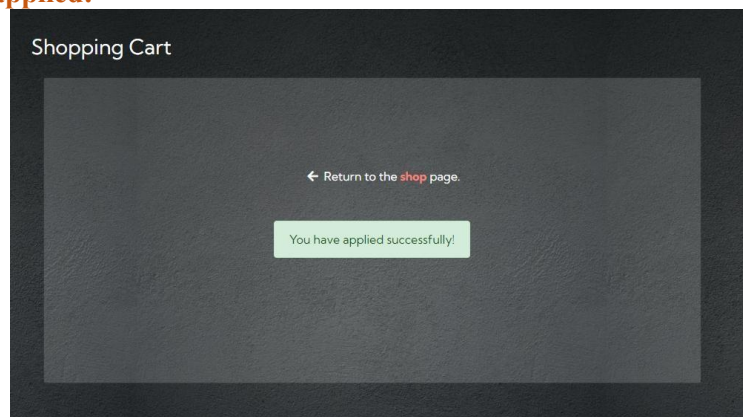

Funkcija `applyOrder()` - aktivira se na klik dugmeta sa ID-em "apply". Dodaje element u HTML koji prikazuje animaciju učitavanja (preloader). Nakon sto animacija traje 3 sekunde, funkcija brise elemente iz korpe za kupovinu i iz `localStorage`-a, a zatim prikazuje poruku o uspesnoj poslatoj porudzbini i vraća korisnika na stranicu shop.html.

## Filtriranje i sortiranje

Filtriranje i sortiranje predstavljaju funkcionalnost koje korisnicima omogućavaju da lako pronadju zeljene proizvode na osnovu razlicitih kriterijuma. Proizvodi se filtriraju na osnovu kategorija, brendova, popusta i operativnih sistema, a sortiraju na osnovu cene (rastuce, opadajuce), naziva (rastuceg, opadajuceg) i datumu objave (godina).

### ➤ Filtriranje:

Kada korisnik zeli da filtrira proizvode, moze da odabere jednu od sledecih kategorija: monitori, kucista, maticne ploce i gracike. Kada korisnik odabere kategoriju, prikazace se samo proizvodi koji pripadaju toj kategoriji.

Korisnik moze da filtrira proizvode koriscenjem tekstualnog polja za pretragu proizvoda po njihovom nazivu (search).

Korisnik takodje moze da filtrira proizvode na osnovu brenda: LG, Asus, Apple i Samsung.

Korisnik takodje moze da filtrira proizvode na osnovu popusta. Moguce je izabrati da se prikazu samo proizvodi sa popustom (15% i 35%) ili samo proizvodi koji nemaju popust. Ovo je odradjeno sa radioButton-ima.

Konacno, korisnik moze da filtrira proizvode na osnovu operativnog sistema. Moguce je odabrati jedan od tri OS: Windows, Linux ili MacOS. Moguce je da jedan proizvod podrzava vise operativnih sistema.

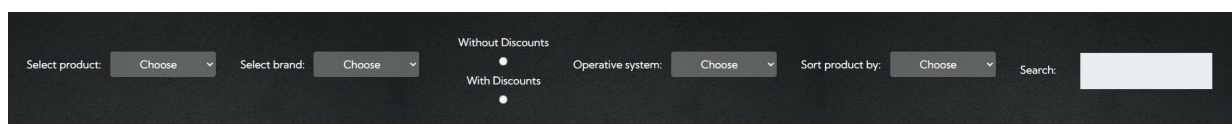

### ➤ Sortiranje:

Kada korisnik izabere sortiranje na osnovu cene, proizvodi ce se prikazati po rastucoj ili opadajucoj ceni.

Kada korisnik izabere sortiranje na osnovu naziva, proizvodi ce se prikazati po rastucem ili opadajućem redosledu.

Kada korisnik izabere sortiranje na osnovu datuma objave, proizvodi ce se prikazati po godini.

**\*Korisnik moze da primenjuje vise kriterijuma filtriranja i sortiranja istovremeno, kako bi pronasao zeljeni proizvod ili grupu proizvoda.**

U slucaju da ne postoje trazeni proizvodi, korisnik dobija obavestenje:

## Validacija forme

Funkcija **checkValidation()** - obradjuje greske I proverava ispravnost forme. Ispod svakog inputa, t na dogadjaj **blur** se prikazuje poruka o gresci I to je odradjeno pomocu svojstva **errorMessagees**(ukoliko korisnik nije uneo vrednost u polje, prikazuje se tekst "This field is required") I svojstva **.invalid**(proverava da li je vrednost koju je korisnik uneo u odredjenom polju u skladu sa regularnim izrazom). Puno ime, email I lozinka imaju svoje definisane regularne izraze. Podaci o inputima su ispisani u posebnoj JSON stranici: **inputs.json**. Takodje, u ovoj funkciji se nalaze sledece ugnjezdene funkcije:

- 1) Funkcija **checkIfTownIsSelected()** - proverava da li je korisnik odabrao grad iz padajuće liste, a zatim prikazuje odgovarajucu poruku o pogresci ako grad nije odabran, pomocu metode **blur**.
- 2) Funkcija **isButtonClicked()** - proverava jesu li sva obavezna polja u formi popunjena I da li je korisnik odabrao svoje godine (mladje ili starije od 18), kao I najmanje jedan odgovor izmedju ponudjenih opcija o tome kako je cuo za stranicu Webio Shop. Ako postoje prazna polja ili nedostatak, funkcija ce postaviti odgovarajucu poruku o pogresci, a ako su sva polja ispunjena, prikazace poruku o uspesnom slanju.

Funkcija **numberOfCharacters()** - ova funkcija se nalazi van funkcije **checkVaildation()**. Obradjuje textarea element koja ima brojac koji broji karaktere pri svakom keyup dogadjaju I ogranicava maksimalan broj znakova na 200.

          <p class="py-2 para-light">
            I am Nevena Nikolić, a 23 year old student that
is curenly<br> studying
              Web programming module on the Internet
technologies, <br>a part of the ICT College in Serbia.
                I come from Pancevo, a city near<br> the
capital city of Serbia Belgrade, where i finished
                  elementary and <br>high school. By enrolling
in ICT my decision to tinker with computers <br>was
                    my way to set a stable future for me, right now
in the specter of <br>Web, and who knows what
                      tommorow. By now i have 3 projects </br> that
helped me hoan the knowledge that i currently hold,
                        and use </br> on my wesites.<br><br>
&#60;/hello&#62;
